GLASS★CRAFT®
DOOR COMPANY

CUSTOM DOORS, MADE JUST FOR YOU

Why Choose a FiberCraft® Composite Door?

GlassCraft's FiberCraft doors offer unique, patented door designs, products, and processes along with excellent affordability and availability. Plus the best, most realistic finishes available. In fact, GlassCraft has received more than 20 US Patents on these unique products. And our new DoorCrafter app lets you create a custom-made door....just for you!

✓ **Custom Doors.** You pick the design and impact that fits your individual style. You select the size and color...glass texture and opacity... the door texture and the hardware, door swing direction and configuration. Then we add in the security... the precise fit... and the quality, durability and energy efficiency that you and your family require and deserve.

✓ **Strong and Durable.** FiberCraft doors are the strongest, most durable, and best-looking composite doors available. Our modern doors are not available from any other manufacturer. And GlassCraft's wood-grained composite doors look like real wood. No other fiberglass composite door has a more distinguished detail, a more refined tactile surface, or simply a more carefully crafted appearance than GlassCraft's Artisan and Estate finished fiberglass doors. Plus it is an environmentally friendly product and offers many options for customization to suit customer requirements. FiberCraft also offers an extensive selection of designs, including many unique options. See the multiple benefits of a FiberCraft entry door at the bottom of the next page.

✓ **Patented & Innovative.** GlassCraft Door Company has taken product innovation further by incorporating environmentally friendly materials and processes in the production of its fiberglass doors and frames. GlassCraft has been awarded multiple industry honors in recognition of its DuraFinish™ fiberglass finishing system and BioFoam® premium core, both patented technologies that produce better doors in terms of appearance, performance and environmental benefits. Check out these advantages:

✓ **The DuraFinish™ Fiberglass Finishing System** — This patented technology involves the use of water-based finishing instead of solvent-based finishing. Benefits include 100% reduction in Hazardous Air Pollutants, very low VOC, improved air quality in the workspace, superior weatherability and authentic woodgrain appearance.

✓ **BioFoam® Premium Foam Core** — An alternative to standard polyurethane foams, GlassCraft's BioFoam® contributes to green building sustainability and reduced fossil fuel usage. BioFoam® is a patented plant-based, formaldehyde-free, water-blown, rigid, closed-cell foam formulated for GlassCraft for use in its FiberCraft® Premium Composite doors. This foam is a giant leap forward in regard to environmental and health benefits, while contributing to the superior performance of GlassCraft's fiberglass doors.

Visit www.glasscraft.com for more details.

How To Use This Catalog & The DoorCrafter™

To quickly and easily find additional information for individual doors in this catalog, such as pricing and door options, scan the QR Code at the bottom of each page with your phone or tablet. This action will take you directly to the online catalog page that you scanned (you can also access the online version of this catalog on our website with your computer).

Once you have accessed the catalog online, you may click on any individual door image which will take you to that specific door in our new DoorCrafter design tool.

Once you are in the DoorCrafter design tool, you can “build” the door you chose your way, to your exact specifications.

Here you have access to the most up-to-date list pricing, as well as the ability to choose all of the available options (such as size and color, prehang information, etc.) through drop down menus for that specific door. The price will change accordingly, depending on which options are chosen and if there is an additional cost associated with the option. Once you have designed the door exactly the way you want it, you will have the correct list price for your door and the ability to find a store in your area that sells GlassCraft products.

Accessing The Catalog

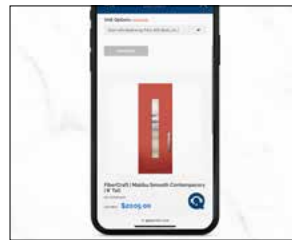

Step 1

Scan the QR Code at the bottom of the catalog page with your Mobile device. The online version of that page pops up.

Step 2

Click on the + sign on the door of your choice.

Step 3

Build a door to your exact specifications by choosing from available options with up-to-date pricing.

The Benefits of GlassCraft's FiberCraft® Doors

- Authentic and realistic wood grains
- Patented CFC-Free “green” polyurethane BioFoam® core in Premium Series doors
- Patented Award-Winning Low VOC and HAP-free finishing process
- Patented Artisan door distressing process
- Patented real handmade external wrought iron grille options
- Patented GBG grille options
- High resistance to extreme temperature fluctuations
- Door and sidelite frames will not rot, warp, split or crack
- Full-size doors available for replacement in your current home
- Limited lifetime warranty for Premium Series
- Impact tested and approved entry configurations
- Composite pre-hung entry options with transoms and sidelites
- Rustic door options with speakeasies, straps and clavos
- Solid reinforced stiles from top to bottom eliminating thermal deflection for Premium Series and NP Series doors
- Narrow Profile door series offers trending designs to personalize your home

The FIBERCRAFT® VALUE / PRO / PREMIUM SERIES DOORS

Three Series of FiberCraft Doors

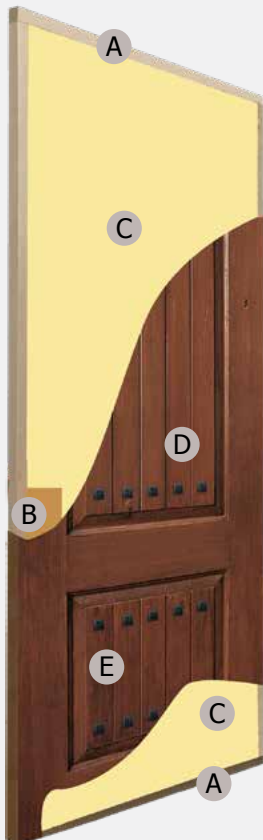

Three different FiberCraft Door Series are available: The VALUE SERIES, the PRO SERIES and the PREMIUM SERIES. The **FiberCraft Value Series** is our most economical series and includes a 2-year warranty. Included are 2-6 / 2-8 / and 3-0 door widths and 6-8 and 8-0 door heights. These V-Series doors are either solid doors (no glass) or flush-glazed glass doors. Lock blocks on both sides and composite edges on all 4 edges. Square edged door.

The **FiberCraft Pro Series** includes a 5-year warranty on both the door and the finish performance. This door features a smooth surface or high-definition wood grain on both 6'8" and 8'0" tall doors. Lock-blocks on both sides and composite edges on all 4 edges. The Pro Series is available with all Estate Collection wood finish options or Palette Collection paint finish options. The Pro Series doors look virtually identical to the Premium Series wood grained doors, and at a lower price.

BENEFITS	GlassCraft Premium Series	GlassCraft Pro Series	GlassCraft Value Series
High-Definition wood grains	✓	✓	✓
Plant-based 3 lb. density urethane bio-foam	✓	no	no
Standard 2-pound density urethane foam	not needed	✓	✓
Water-blown foam	✓	✓	✓
Reinforced Stiles on both door edges	✓	✓	✓
Lock blocks on both door sides	not needed	✓	✓
Composite rails to eliminate moisture	top and bottom	all edges	all edges
Solvent-free finishing system	✓	✓	✓
Very low VOC finishing process	✓	✓	✓
No HAPs emitted in finishing	✓	✓	✓
Low toxicity MDI used in production	✓	✓	✓
No Styrenes in foam or finishing	✓	✓	✓

FiberCraft Premium Series doors are the strongest, best-built fiberglass composite doors available, and include a lifetime warranty on the door slab and a 5-year warranty on the door finish. They are constructed with full length, full width door stiles built into BOTH long side edges of the door to virtually eliminate thermal warping and deflection in cold or hot weather, and to add significant strength to the door. These door stiles are produced using an LSL Laminated Strand Lumber beam made from sustainable Aspen timber. Premium Series doors also use our patented BioFoam® door core — both are green innovations that provide a strong, high-performance door. Premium Series doors are available with all Estate Collection, Artisan Collection, and Palette Collection door finish colors and wood grains.

Visit www.glasscraft.com for warranty details.

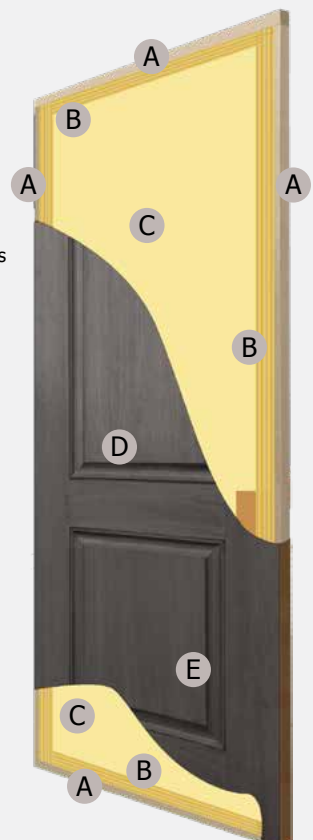

✓ Pro Series

- A** Top and Bottom Rails are made from composite material and is rot-resistant and waterproof.
- B** Wood stiles with lock-blocks used on BOTH door edges for strong mounting of door hardware on either right or left side of door. Top rail is made of wood.
- C** The core of the door is filled with a 2-pound density urethane foam for good insulation performance.
- D** Award-winning Estate prefinish options provide the most authentic wood grains. Also available is the Palette Collection of 9 paint color finishes.
- E** The fiberglass reinforced door skin exactly imitates highly detailed wood door grains for a high-definition wood appearance.

✓ Value Series

- A** Top and Bottom Rails and vertical door stile edges are made from composite material and are rot-resistant and waterproof.
- B** Laminated Veneer Lumber LVL stiles on all 4 edges with trimmable 3/4" thick composite edges. Lock-blocks used on BOTH door sides for strong mounting of door hardware on either right or left of door.

LVL/Composite stiles are 1-3/4" wide on 6'8" tall doors and 2-3/4" wide on 8'0" doors.
- C** The core of the door is filled with a 2-pound density urethane foam for good insulation performance.
- D** Palette and Estate finish Collections prefinish options provide a beautiful range of paint and stain colors. These doors may be painted or stained.
- E** The fiberglass reinforced door skins imitate detailed wood grain texture for an authentic appearance. Other doors offer a smooth surface without texture.

The FIBERCRAFT® NARROW PROFILE SERIES DOORS

Premium NP Series Feature Solid Stiles and Rails

The **Premium Narrow Profile NP-Series** are ultra-modern fiberglass doors featuring smooth door surfaces and are excellent for painting. The Premium NP-Series includes a lifetime warranty on the door and a 5-year warranty on the finish performance. These doors are available in both 6'8" and 8'0" heights, and widths of 30", 32", 36" and 42" (not all models available in all sizes). The NP-Series section of this catalog starts on page 40.

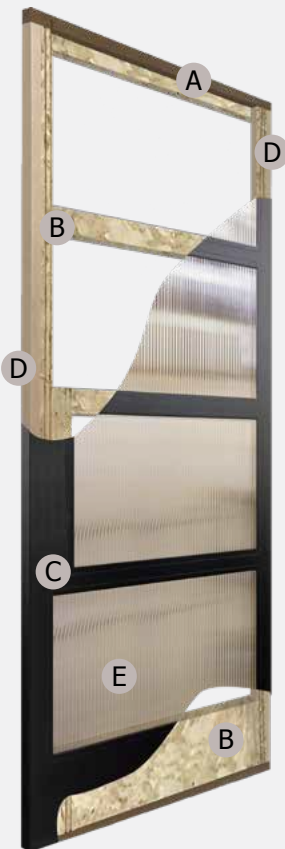

Two different door construction methods are used for the **NP-Series**. The **NP-TDL** or True Divided Lite Series features and **NP-SDL** or Simulated Divided Lite Series. Both feature solid construction (no foam) with moisture resistant top and bottom rails, and lock-blocks on one door edge. See the NP Series starting on page 40 for more information.

BENEFITS	GlassCraft NP-TDL Series	GlassCraft NP-SDL Series
Smooth modern surface	✓	✓
Solid core construction	✓	✓
Reinforced stiles on both door edges	✓	✓
Composite rails to eliminate moisture	top and bottom	top and bottom
Includes Multipoint locks standard	no	✓
Solvent-free finishing system	✓	✓
Very low VOC finishing process	✓	✓
No HAPs emitted in finishing	✓	✓
Pultruded fiberglass SDL bars	not needed	✓

FiberCraft Door Sizes

Value Series and Pro Series doors are available at the standard industry sizes shown on the chart at right. (These are the actual sizes of the door slab, not the pre-hung unit sizes). Premium Series doors are available in these same sizes, or may be available in full "book" sizes as shown in the chart. This may add an extra charge — please inquire.

DOOR SIZES	Value & Pro Series	Premium Series Custom	Premium Series Standard
• 3-0 x 6-8 Door Slabs:	35-3/4" x 79-1/4"	36" x 80"	36" x 79-1/4"
• 2-8 x 6-8 Door Slabs:	31-3/4" x 79-1/4"	32" x 80"	32" x 79-1/4"
• 2-6 x 6-8 Door Slabs:	29-3/4" x 79-1/4"	30" x 80"	30" x 79-1/4"
• 3-0 x 8-0 Door Slabs:	35-3/4" x 95-1/4"	36" x 96"	36" x 95-1/4"
• 2-8 x 8-0 Door Slabs:	31-3/4" x 95-1/4"	32" x 96"	32" x 95-1/4"
• 2-6 x 8-0 Door Slabs:	29-3/4" x 95-1/4"	30" x 96"	30" x 95-1/4"

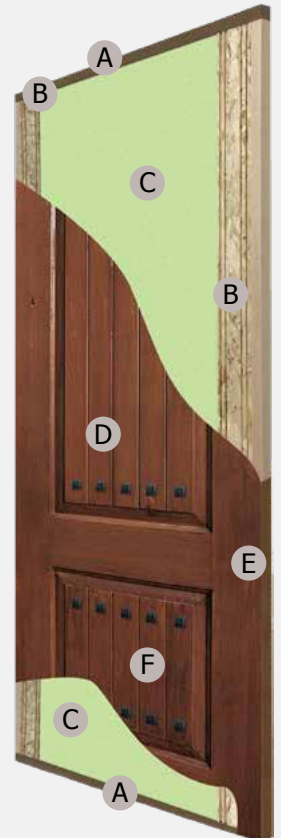

✓ NP-TDL Series

- A** Top and Bottom Rails use 100% recycled composite content and are completely rot-resistant and waterproof.
- B** The door core is made from LSL Laminated Strand Lumber to provide a solid and strong door interior.
- C** The smooth fiberglass reinforced door skin is twice the thickness of our other doors skins at 5mm thick.
- D** Both long door edges are constructed using hard-rock maple for screw holding strength and beauty.
- E** Separate double-layered Insulated "IG" Glass panels are tempered safety glass and provide security and energy efficiency. Several glass textures are available.

✓ Premium Series

- A** Top and Bottom Rails utilize 100% recycled composite content and are rot-resistant and waterproof.
- B** Wide LSL Laminated Strand Lumber stiles used on BOTH door edges virtually eliminate the potential for warping, and provide a secure mounting for door hardware on either door edge.
- C** The core of some doors are filled with patented BioFoam®, a unique insulating 3-pound foam produced utilizing plant-based oil sources, and is 50% more dense than Pro-Series and Value Series.
- D** Award-winning Estate, Artisan, and Palette Collection finish options provide beautiful authentic wood grains or smooth non-textures surfaces, utilizing a water-based process that emits zero hazardous air pollutants.
- E** Both door edges are constructed using hard-rock maple for screw-holding strength and beauty.
- F** The fiberglass reinforced door skin exactly imitates highly detailed wood grains for a high-definition appearance.

PAINT Finish PALETTE COLLECTION™ for Pro and Premium Series

Palette Collection™ Paint Finish Options for All FiberCraft Doors

Nine trending colors are offered in GlassCraft's **Palette Collection** of paint colors for our FiberCraft doors. Each year, paint companies and color experts reveal their picks for the shade that best encapsulates current trends. Their choices for color of the year often draw on trends in pop culture, fashion, technology, and design from around the world. The nine colors in our Palette Collection are all top trending colors for exterior use for exterior doors.

GlassCraft's exterior door paint is a protective monochromatic coating specifically formulated for use on exterior surfaces. A single-component, water-borne, acrylic, adhesion-promoting coating. Formulated for direct application and exterior use, this coating has outstanding adhesion and eliminates the need for a primer coat.

All colors shown on these pages are available on all Premium, Pro and Value Series composite doors with a wood grain texture or with a smooth surface.

Please Note: The photos on this page and throughout this catalog offer an indication of the actual appearance of the colors, but due to variations in the texture, grain pattern, and colors used in this hand-finished process, the actual appearance will vary.

Shown here: 3'0" x 6'8" FiberCraft Pro Series Beverly Door and matching 18" wide sidelite, with Grey Clouds Palette Collection finish, Clear glass, and a Lumina Satin Nickel handleset.

Palette Collection

Color Name & Description:

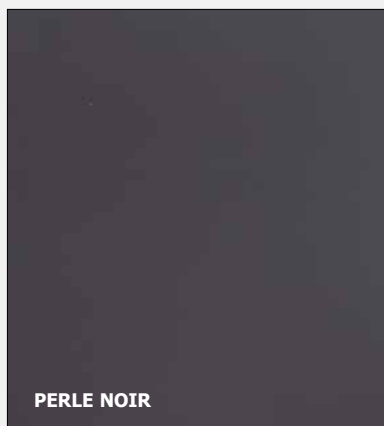

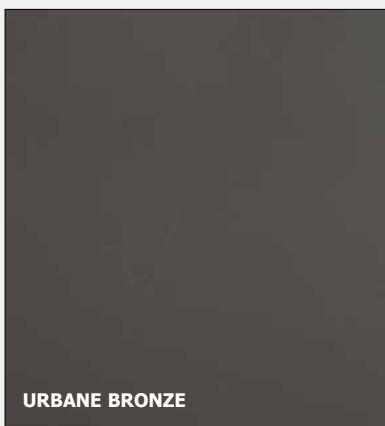

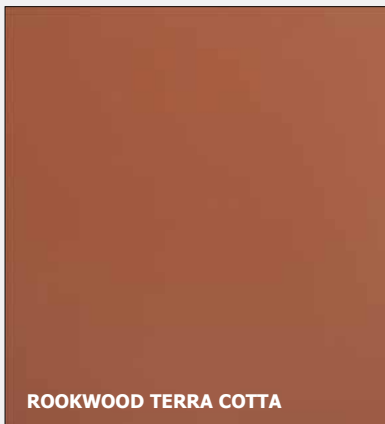

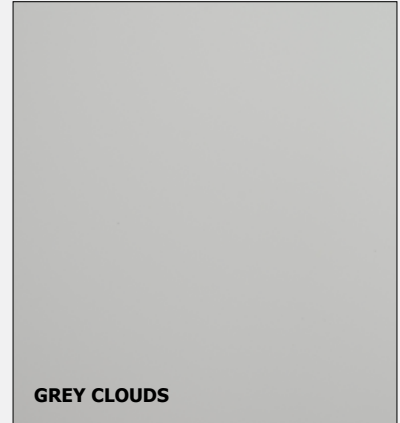

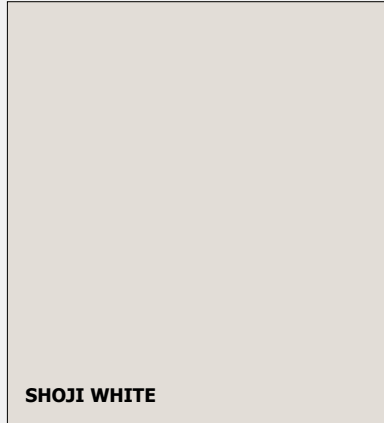

- **Arcade White**... think of a cup of milk with a dash of coffee, creating an inviting and warm door or entryway.
- **Shoji White** is a warm white, with greige (beige and gray) undertones. It has a nice creaminess to it, but its greige undertones keep it from looking too yellow. It won't end up looking cold on a door even if it's facing north or east.
- **Habanero Chile** is a true red-orange with depth and vibrancy to set glam in the entryway space. This striking color is warm, energetic and high impact. It is a fantastic and dramatic paint color for a front door.
- **Grey Clouds** is a neutral, midtone grey that may tend to the warmer side.
- **Gale Force** is a darker, neutral, emerald aqua-green with a hint of blue undertone. Perfect for a door with some drama.
- **Rookwood Terra Cotta** is a warm pastel red-orange which offers an old, earthy feel for a different yet unique focal point.
- **Urbane Bronze** is a deep taupe color... essentially a dark brown with an added grey aspect, which gives it a green undertone in bright lighting. It's earthy core gives off a comforting warmth.
- **Perle Noir** is a rich charcoal color, and is a good paint choice if you are looking to add drama to your door with some sophistication.
- **Tricorn Black** has no discernible undertones and it's truly a neutral paint color. If you're looking for a true black, go with Tricorn Black.

9 FIBERCRAFT® TEXTURES

Select from Different Wood Grain Textures and Door Panel Profiles

Choose from one of the following 4 door skin textures (Knotty Alder, Mahogany, and Fir wood grains, or Smooth). Each texture is available in up to 4 different finishes (Paint finish, Estate stain, Artisan stain, and Artisan Distressed stain). Different door profiles offer different texture choices and different panel profiles — these options are shown below. Premium Artisan Collection wood grains are available with a factory prefinish only. Estate Collection wood grains are available unfinished or with a factory prefinish.

MAHOGANY

Estate Mahogany wood grain and panel profile available unfinished or prefinished

Artisan Antique Mahogany (shown with Craftsman Door panel) available prefinished only

Artisan Distressed Mahogany wood grain and panel available prefinished only

FIR

Estate Fir Craftsman/Shaker panel and wood grain available unfinished or prefinished

Artisan Antique Fir panel and wood grain available prefinished only

Artisan Distressed Fir wood grain and panel available prefinished only

KNOTTY ALDER

Estate finish N/A on Knotty Alder grain doors

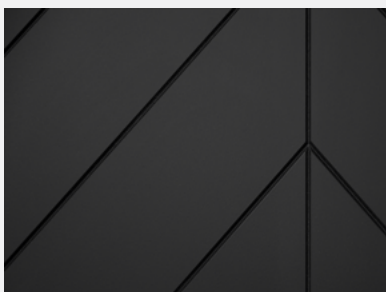

Artisan Antique Knotty Alder grain and panel profile available prefinished only

Artisan Distressed Knotty Alder grain and panel profile available prefinished only

SMOOTH

Smooth Composite with Palette Collection paint finish (Tricorn Black shown here)

Artisan Antique finish N/A on Smooth doors

Artisan Distressed finish N/A on Smooth doors

Estate Collection® Finish Options for Pro, Premium or Value Series Doors

Looks so good, you'll think it's wood.®

GlassCraft's Estate and Artisan Finish Collections feature the most authentic wood grains and wood appearance, and are unlike any other fiberglass door available. Our Estate Finish Collection is available on **Pro Series, Premium Series, and Value Series** doors in all wood grain textures. The Artisan Finish is offered in Antique and Distressed options on all **Premium Series** doors, in all wood grain textures. All finishes feature the beautiful details, warmth and color of a real wood door!

The **Estate Collection®** Factory Finish options are available for Pro, Premium, or Value series doors, and maximize the beauty and richness of Mahogany and Fir woodgrains by utilizing a long-lasting, multi-layered and multi-colored layering process. This 10-step finish process combines multiple coats of colors and a clear, durable urethane topcoat to preserve the beauty of your door. It provides a natural, authentic wood grain and color finish on a fiberglass/composite door that has been designed to last.

Any of the five Estate Collection finish colors shown here are available on any wood-grained door listed in this catalog.

This patented finishing system applies multiple layers of beautifully colored stains and protective crystal clear, durable and hard finish coat while making the process environmentally friendly. Each coat is steeped with ultraviolet UV-inhibitors and enhanced by additional technology to keep your door looking beautiful. This system produces a finish that is unmatched by any other fiberglass door.

GlassCraft Door Company's Estate & Artisan Finishing Process was awarded the Texas Environmental Excellence Award. In addition, these composite doors won the *Window & Door* Crystal Achievement Award for Unique Innovation and the National Manufacturing Leadership Award for Sustainability.

GlassCraft's factory finish includes a 5-year finish warranty. Visit www.glasscraft.com for details.

ARTISAN COLLECTION ANTIQUE FINISH for Premium Series

Artisan Collection® Antique Finish Options for Premium Series Doors

Enjoy all the charm and character of real wood doors without all the maintenance. With GlassCraft's award-winning finish system, the Artisan Antique Collection of finishes are not only beautiful, but also long-lasting, with the most authentic wood grains that look like real wood. The Artisan Antique Finish options feature specially formulated antique patinas with depth and richness of color, enhanced with beautiful wood grain patterns.

GlassCraft's patented finish process enhances the stains with a long-lasting, multi-layered, urethane finish. This 12-step finish process combines multiple coats of stains and clear hard and durable topcoats with ultraviolet inhibitors to preserve the beautiful appearance of the door.

All of the colors shown on these pages are available on all Premium Series composite doors with a wood grain. These are not available on smooth doors without a wood grain or on any Value or Pro Series doors.

Artisan Antique finishes are available on Premium-Series doors in 2 wood grains: Mahogany and Fir. Please note: The photos here and throughout this catalog offer an indication of the actual appearance of the colors, but due to variations in the texture, grain pattern, and colors used in this hand-finished process, the actual appearance may vary.

Shown with Artisan Antique finish with Knotty Alder wood grain. Features nuanced wood colors and rich undertones produced by GlassCraft's award-winning prefinishing system.

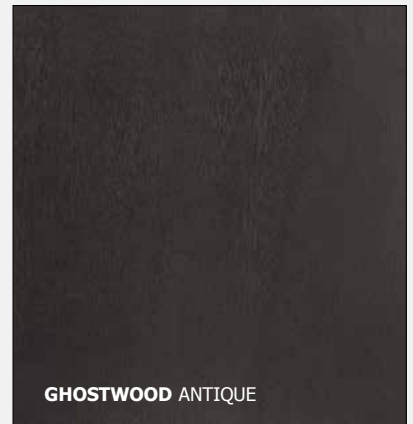

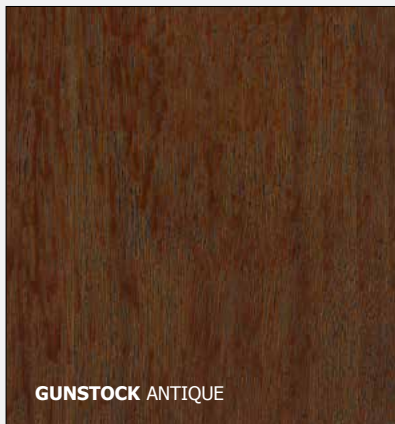

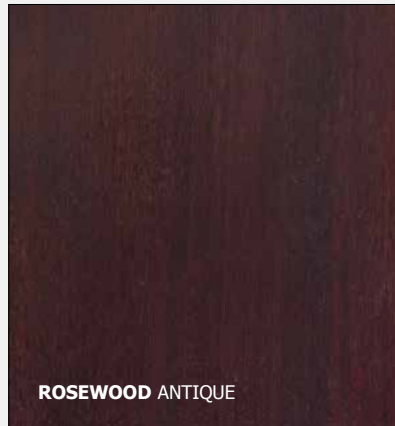

Close-up of Artisan Gunstock Antique finish.

Artisan Antique Collection Color Name & Description:

- **Pecan Antique** – Lighter than Weathered Saddle and darker than Gunstock, features rich caramel undertones.
- **Gunstock Antique** – Features warm golds and browns, deep umber and ochres.
- **Weathered Saddle Antique** – Deep rich ambers with warm honey highlights and dark umber streaks.
- **Rosewood Antique** – A deep mocha with subtle ruby streaks and a black glaze.
- **Espresso Antique** – A dark grey/black with coffee undertones.
- **Onyx Antique** – Very dark grey with a hint of a cool brown.
- **Midnight Grey Antique** – True dark; lighter than Espresso without the coffee highlights.
- **Ghostwood Antique** – A blend of grey and brown, with undertones of green or blue.
- **Laurel Grey Antique** – A medium/dark grey with slight cool green undertones. Shown at left.

ARTISAN DISTRESSED FINISH COLLECTION

Artisan Collection® Distressed Finish for Premium Series Doors

A GlassCraft exclusive — the Artisan Distressed Finish options feature a patented process to beautifully create high-definition distress marks and enhanced wood grain patterns to simulate old, antique doors. Scuffs and scratches, wood checks and cracks, worm holes and wear marks are randomly applied to the surface of the door. These marks are then enhanced with our patented finish process to create the perfect shabby-chic entryway statement!

This finish process enhances the stains, grains, and distress marks with a long-lasting, multi-layered, and multi-colored finish. This 12-step finish process combines multiple coats of stains and clear urethane topcoats with ultraviolet inhibitors to preserve the beautiful appearance of the door.

All of the colors shown on these pages are available on all Premium Series composite doors with a wood grain. These are not available on smooth doors without a wood grain or on any Value or Pro Series doors.

Artisan Distressed finishes are available on Premium Series doors in 3 wood grains: Mahogany, Knotty Alder, and Fir. Please Note: The photos on this page and throughout this catalog offer an indication of the actual appearance of the colors, but due to variations in the texture, grain pattern, and colors used in this hand-finished process, the actual appearance may vary.

Artisan prefinishing with distress marks is perfect for achieving authentic rustic details. The faux mortise and tenon pegs shown in the inset photo are standard on Artisan Distressed Craftsman doors.

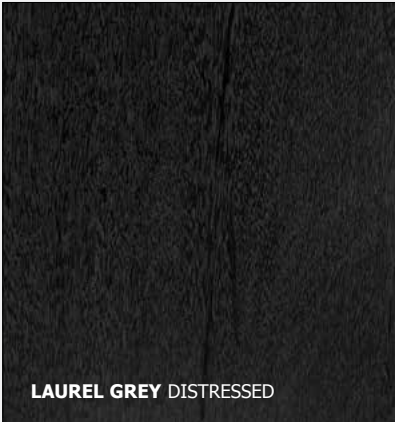

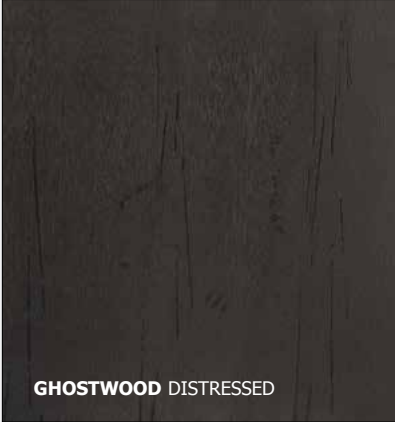

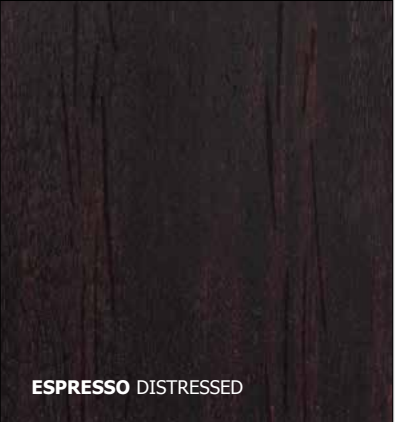

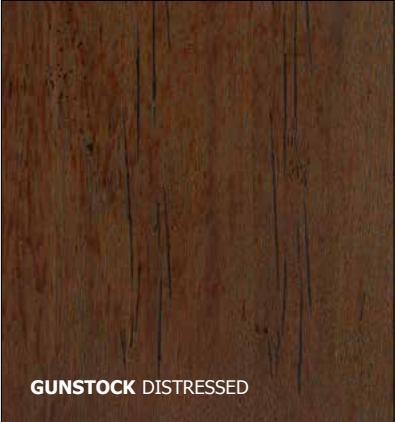

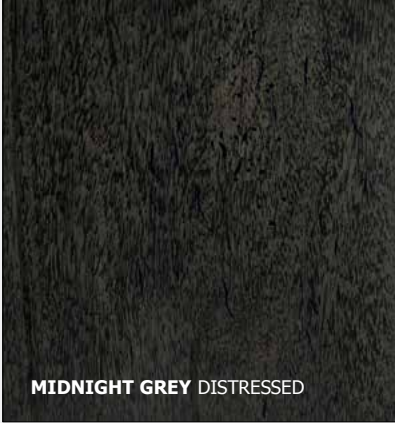

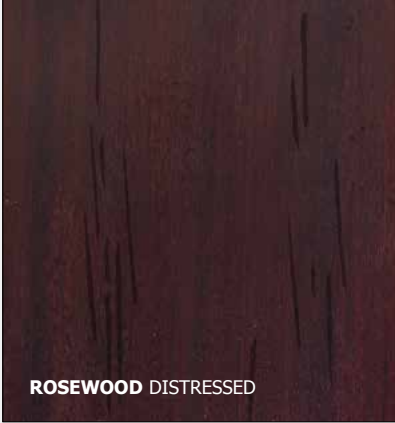

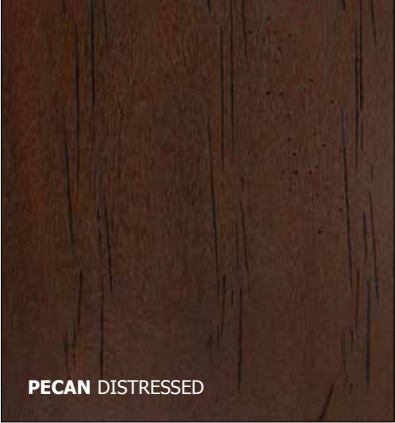

Close-up of Artisan Distressed Laurel Grey finish.

- A Patented Artisan finish provides richness and dept of color similar to the nuanced colors of real wood. Looks and feels like real wood!
- B Realistic wood patterns mimic the natural characteristics of Mahogany, Knotty Alder, and Fir wood grains.
- C Optional V-Grooved detail adds an authentic rustic look.
- D Authentic Distress marks employ a patented laser technology.
- E Optional decorative, hand-cast and hand-made iron clavos can add extra rustic detail.

“Looks so good, you’ll think it’s wood.”®

PRE-HUNG OPTION & ADVANTAGES

Pre-hung All-Composite Entryways with Continuous Sill

Pre-hang Option

GlassCraft doors in this catalog can be ordered as pre-hung door units. Drawings and part numbers for available configurations of pre-hung doors are shown via our online catalog.

Most entryway configurations (except Impact rated units) available for FiberCraft doors include "continuous" one-piece sills. This means that the bottom sill or threshold is made from one continuous piece of threshold material which adds strength and prevents leaking under the entryway. This assembly design is especially important with configurations that include 1 or 2 sidelites. Impact rated pre-hung options use a "boxed" construction method with separate sills for each sidelite.

GlassCraft uses a 1-piece continuous sill construction method for reinforced strength and enhanced appearance.

Pre-hung Components

Standard Pre-hung entryways include the following:

- 4-9/16" Jamb Legs
- Header
- Standard Sill
- Hinges
- Weatherstrip
- T-Astragal (where applicable)
- Flush Bolt (where applicable)
- Mull Posts (where applicable)

Optional Pre-hung components at extra charge:

- 6-9/16" Jamb Legs
- Brick Mold
- Endura Sill
- Door Sweep
- Door Bore
- Strikejamb Reinforcement
- Multipoint Hardware
- Construction Doors

Use your cell phone camera
or QRC scan app to **SCAN**

FIBERCRAFT® PRE-HUNG DOOR OPTIONS

Composite Sidelite Options for Pre-hung Units

All Fiberglass Composite Doors in this catalog can be ordered as pre-hung door units with one or two sidelites. Many door designs have specific matching sidelites. Refer to the DoorCrafter online for exact options available for each door.

In addition to the matching sidelite designs mentioned above, all doors may be ordered with one or two "Flush Glazed" sidelites with Clear glass only. Flush Glazed sidelites for 6'8" tall doors include an insulated glass panel that is approximately 80" tall, by either 12" or 14" wide. Full lite sidelites for 8'0" tall doors include an insulated glass panel that is approximately 96" tall, by 12" or 14" wide. (Visible glass is 1" less than these measurements). These "flush glazed" sidelites do not have a sash — the clear insulated safety glass is glazed directly into the door frame.

Designed to add a contemporary appeal to the entryway with minimal detail, these flush-glazed sidelites will complement all doors in this catalog. They feature boxed construction where the all composite sidelite is a separate piece or unit from the pre-hung door. Interior and exterior mull covers (included) are used to trim the door jamb and the sidelite jamb legs.

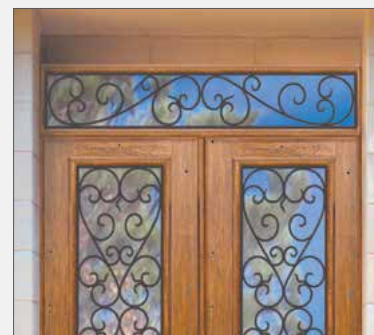

Many doors offer matching sidelite designs, as shown above. All doors in this catalog are available with "Flush Glazed" sidelites as shown at right.

All doors in this catalog are available with one or two full flush-glazed sidelite units. The entryway above features a Narrow Profile TDL door (see section 4 NP and Long Pull Doors) with two 14" flush glazed clear glass sidelites.

Composite Transom Options for Pre-hung Units

Matching Transoms are available with the Grille-Between-Glass, Simulated Divided Lite, and Clear & Privacy glass options. Refer to the DoorCrafter online for exact options available for each door. Transoms are available in direct-set configurations only (no sash around the glass). Each transom is available in varying widths, depending upon the door or door and sidelite configuration below the transom. Transoms are made with an all-composite, no-rot material and can be stained or painted. Refer to our online product guide for more information.

All-Composite Components

All GlassCraft Fiberglass Composite Doors in this catalog can be ordered as pre-hung door units. Configuration drawings and pricing for pre-hung doors are available via our online catalog. GlassCraft uses our exclusive all-composite material in all FiberCraft pre-hung entryways. This WPC (wood polymer composite) material resists decay and rot, is impervious to weather, and will not crack or split like wood jamb legs. All jamb legs, headers, brick mold and sills utilize composite materials and no wood parts are used in the pre-hung components.

When ordered as a pre-hung unit, doors with a wood grain include wood-grain components. Smooth doors include jamb components without a wood grain.

Standard pre-hung units include 4-9/16" wide jamb legs, jamb header, adjustable threshold, weatherstripping, plus 3 ball-bearing hinges on 6'8" tall doors and 4 ball-bearing hinges on 8'0" tall doors, plus T-astragal (for double doors), and mull post and flush bolts (where needed and applicable). Pre-hung unit options include door sweep, brick mold, 6-9/16" wide jamb, Endura™ brand or ADA sills, StrikeJamb™ reinforcement, and door boring for hardware.

Unfinished in tan color, with a wood grain. Easily paintable or stainable composite jamb material. Also available smooth, without grain.

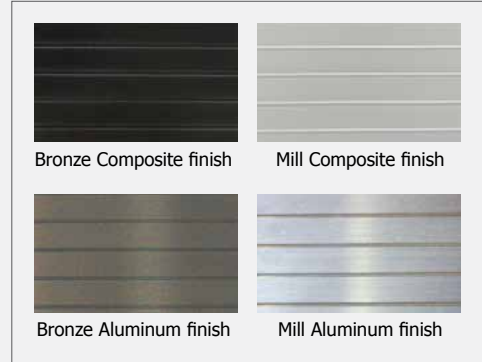

Prefinished, shown with detailed wood grain. Composite jamb material will not rot, warp, split or crack.

PRE-HUNG OPTION & ADVANTAGES

Sill and Sill Color Options

All standard pre-hung exterior door units use adjustable composite sills that help prevent water penetration, rotting, warping, and discoloration. Our standard adjustable composite sill includes a peel-off film which protects the sill during construction, and is made from 100% composite materials. The “adjustable” feature allows the top of the sill to be adjusted with a screwdriver to match the correct height required for the bottom of the door. Optionally, you may select the Endura® Brand adjustable composite threshold (for an extra charge) that is made from composite and aluminum material or an ADA aluminum threshold. The ADA threshold is approved for use with wheelchairs. ADA sills are 5” x 1/2” or 7” x 1/2”. The Endura Z-Series sill system provides a walnut colored sill cap, the adjustable feature, and a hard plastic, protective construction cover.

Composite Door Frames with STRIKEJAMB™

All FiberCraft pre-hung doors are available with a steel-reinforcement StrikeJamb™ as an option. Pre-hung units include jamb legs, T-astragal (for double doors), standard sill, header, weatherstripping, and adjustable threshold, plus 3 ball-bearing hinges on 6’8” tall doors and 4 ball-bearing hinges on 8’0” tall doors.

The StrikeJamb™ reinforcement can be installed on the lock side jamb leg for safety and security. This plate reinforces the jamb leg, and allows the dead bolt and the handleset bolt to throw so that the bolts extend through the corresponding holes in the steel reinforcement plates. In addition, long mounting screws should be used with this StrikeJamb, these screws extending through the jamb leg, then through the steel plate, and finally into the wall studs.

Image at right shows the reinforcing plate from the back jamb leg side, which is hidden from view after installation.

Hinge Color Options

All pre-hung 6’-8” tall units use three 4-inch ball-bearing hinges, while 8’-0” tall units use four hinges. Choose from the three hinge color options shown at left for your pre-hung entry door unit: Oil Rubbed Bronze, Satin Nickel or Flat Black.

PRE-HUNG IMPACT and WINDSTORM RATED DOORS

Impact Rated and Coastal Windstorm Approved

Protect your family and your home with GlassCraft's Impact Rated or Windstorm tested doors. Doors and entryways in this catalog with the logos shown at right below are available to ensure a high level of safety and security against break-ins and weather related impacts. Impact doors are available as slab doors or as pre-hung units.

GlassCraft Premium Fiberglass Composite doors and entryways have been evaluated for compliance and are approved for installation in designated catastrophe areas along the Florida and Texas and other coastal areas when installed as required and as specified in the International Residential Code (IRC) and the International Building Code (IBC). Both 6'8" tall and 8'0" tall entryways have been certified in a variety of entryway configurations, including single doors, double doors, and single doors with 1 or 2 sidelites. Certain Solid doors, Speakeasy doors, and doors with glass have been approved with in-swing and out-swing configurations. Proper installation is required to comply with building codes.

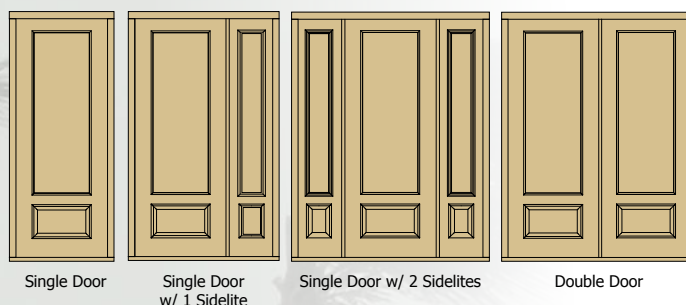

Pre-hung Impact door units are available with Rockwell multipoint locks with Privacy, Solid, Speakeasy, SDL or Wrought Iron grille doors and for in-swing and out-swing single and double door configurations, or single doors with 1 or 2 sidelites. Pre-hung Impact door units OR slab Impact doors (not pre-hung) are available ready for your Schlage or Kwikset lock sets with Privacy, SDL, or Wrought Iron Grille options for in-swing single and double door configurations, or single doors with 1 or 2 sidelites.

Up to 50 DP Rating for Select Impact & Windstorm Tested Composite Doors

Visit www.glasscraft.com for complete information on DP Ratings, approval numbers and availability for Impact tested product configurations.

Available Impact Approved Configurations:

Impact and Windstorm Features:

- **Doors available.** Impact doors are available as privacy doors, SDL divided lite doors, wrought iron grille doors and certain speakeasy and solid doors. Windstorm doors include these same doors plus decorative glass doors. Modern doors and NP-Series narrow profile doors have not been tested and approved for windstorm or impact. We are continuously testing doors, so please refer to our website for current information.
- **Handle set options.** Windstorm / impact units are available for specific Schlage or Kwikset lock sets or specific Rockwell multipoint lock sets. Please note that the Rockwell multipoint handle set must include a lever-action model, not a thumb latch.
- **In-Swing or Out-swing.** Windstorm and impact units are available as both "inswing" and "outswing" units.
- **Laminated glass.** Impact rated units use laminated glass on the exterior side of the glass unit. Windstorm rated units use safety tempered glass.
- **Internal Door reinforcement.** We construct Impact-Rated doors with additional internal reinforcement to withstand potential flying-debris impact.
- **Door height & width options.** We can pre-hang the four entryway configurations shown above using our 3'0" or 2'8" wide and 6'8" or 8'0" tall fiberglass doors and sidelites.
- **Solid Composite Frames.** Offered with Windstorm rated and Impact rated pre-hung units. The composite material used in the door frames and trim is a wood-plastic composite with a wood grain. These "no-rot, no-warp" frames may be stained or painted, and the pre-hung units are available factory finished to match a prefinished fiberglass door.

STRONG and SECURE DOOR LITE FRAMES

Three Door Lite Frame Designs: Aluminum, Fiberglass & WPC

The Door Lite Frame is the moulding assembly that holds the glass in the door, GlassCraft offers 3 plugless frame designs.

Modern and Sleek PLUGLESS ALUMINUM FRAMES

GlassCraft's aluminum door lite frames use an aluminum exterior and interior frame with a polymer internal support structure to provide a sleek and modern appearance along with a thermally-broken design to provide the maximum energy efficiency. No unsightly screws – this product provides a "plugless" frame design.

These frames are almost flush with the surface of the door, and measure 1-1/2" in width. This unique frame system allows for the replacement of your door glass should it be damaged or broken. Plus they are impervious to moisture, and resist damage due to rot and mildew.

These unique Aluminum frames are featured in our Contemporary Entry Door section starting on page 50 of this catalog and the Aluminum SDL-Series on pages 64-65.

Solid and Strong Patented PLUGLESS FIBERGLASS FRAMES

GlassCraft's patented MetroFrame™ fiberglass door lite frames are produced using an industry-leading high-compression fiberglass reinforced frame for superior strength and stability. These frames feature a sleek shape that projects out less than 1/4" from the surface of the door, and measures 1-3/8" in width. The frames do not use external fasteners that require frame plugs to hide the screws, but rather incorporate a multi-patented clip system that does not require external screws or plugs. This unique frame system allows for the replacement of your door glass should it be damaged or broken. No need to replace the entire door as with other "plugless" frame systems. Plus they are impervious to moisture, and resist damage due to rot and mildew. Strong and secure!

Patented design of the fiberglass reinforced glass insert frame creates a strong and moisture-proof barrier. Most doors in this catalog use this fiberglass frame.

Solid and Strong Patented PLUGLESS WPC FRAMES for Windstorm and Impact

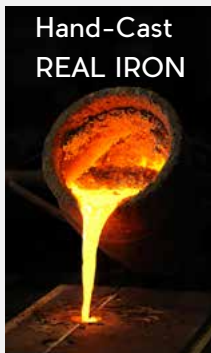

GlassCraft's ClassicFrame™ Windstorm and Impact door lite frames use an extruded solid WPC wood-polymer-composite material and are solid (not hollow) for super strength. These frames do not use external fasteners that require frame plugs to hide the screws, but instead use a patented clip system that does not require external screws or frame plugs. Impervious to moisture, and resist damage due to rot and mildew. Strong and secure, these frames are tested and approved for our Impact-Rated doors and entryways. They are used in all Arch Lite Double and Arch Top double doors in this catalog.

These frames are used when Windstorm and/or Impact doors are required, and in all "Arch Top Double" door entryways, as are found on pages 38, 66-67, and 82-83.

DECORATIVE IRON DOOR STRAPS & CLAVOS

Decorative Door Straps

- | | | |
|---|--|---|
| A | 6" L Strap - CS1 Antique Black | (use for top or bottom rail on R or L side of door) |
| B | 6" L Strap - CS4 Antique Black | (use for top or bottom rail on R or L side of door) |
| C | 6" Arched Strap - CS2 Antique Black | (use on the top cross rail of 2 panel door) |
| D | 6" Arched Strap - CS5 Antique Black | (use on the top cross rail of 2 panel door) |
| E | 12" T Strap - CS6 Antique Black | (use on a door mid rail) |
| F | 12" T Strap - CS3 Antique Black | (use on a door mid rail) |

Sample Combinations of Straps

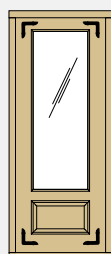

3 Door Straps
Fits 2-panel doors.

2 Door Straps + 1 T Strap
Fits 2-panel doors.
(Latch mounts opposite the T-Strap)

2 Door Straps + 2 Arched Corner Straps
For 2-panel Arch doors.

4 Corner L Straps
For use on all square top doors.

Decorative Clavos

Use these decorative "clavos" or door nails for installation onto the face of the door to give it a rustic or antique look. Clavos can be mounted on the interior or exterior or both sides of a door, and they may be used with or without the door straps shown at left. These clavos are hand-cast and handmade and therefore vary slightly.

3 OPTIONS FOR MULTIPOINT DOOR HARDWARE

Multipoint Locks Offer Strength and Security

Three different multipoint lock solutions are available for all GlassCraft FiberCraft doors. Multipoint locks offer additional security by including three locking bolts instead of just one. The 3 different solutions are:

#1 PANOLOCK PLUS MULTIPOINT The first and only multipoint lock that works with off-the-shelf hardware! Use your own handle set choice! PanoLock is a one-of-a-kind multipoint lock that works with off-the-shelf hardware including electronic locks, supports a forgiving installation, and offers lasting performance, all at an affordable price point. GlassCraft will machine the door and jamb, and will install the PanoLock+ hardware – then you install your choice of door handle set hardware.

#2 BUFFALO FORGE / PANOLOCK PLUS MULTIPOINT (Pages 21-24) All Buffalo Forge® handlesets are available with the PanoLock multipoint upgrade. Hand forged bronze and brass quality with multipoint security and all at a great price!

#3 ROCKWELL MULTIPOINT (Pages 25-27) The Rockwell multipoint is our most economical. This multipoint system is activated with the turning of the dead-bolt lock. All 3 locking points are engaged only when the dead bolt point is locked by turning the thumb latch.

PanoLock Plus Multipoint Hardware

PanoLock is a unique multipoint door hardware system that is compatible with most off-the-shelf door hardware. PanoLock's three locking points activate with a simple turn of the key or thumb lever for the dead bolt. Home builders have asked for a simple and affordable multipoint locking system that can be used with their standard hardware such as Schlage or Baldwin. Simply use the correct lock insert (all are provided) and then mount your handle set hardware. Compatible brands include: Buffalo Forge, Endura, Schlage, Kwikset, Gatehouse, Baldwin, Brinks, Masterlock and Defiant. No dedicated hardware required. PanoLock is produced by Endura.

Single Operation System

Most multipoint locks operate separately, requiring extra steps to lock the door. PanoLock Plus delivers a single operation system by integrating the handleset with the multipoint system using the innovative latch and deadbolt adapters. Simply match the correct adapter to your hardware. The lower operation force and rollers within the plates engage with the bolts to make locking and unlocking your door easy, even after years of use. Unlike other locks that catch easily, PanoLock's tapered bolts deliver a smooth operation even if the door is out of alignment.

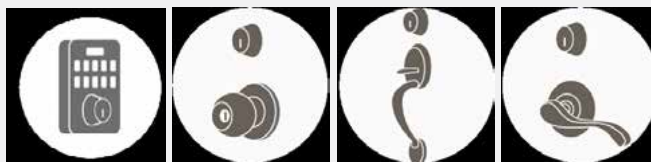

PanoLock Plus Now Works with Electronic Locks

The PanoLock Plus is now compatible with a wide variety of standard hardware, including electronic deadbolts. Use of multipoint locks has been limited due to high cost, difficult installation and operation, and the limitations of dedicated handleset hardware required for each lock offering. Not so with PanoLock®+. Refer to <https://www.enduraproducts.com/panolock-plus/> to see a complete list of the compatible door hardware.

PanoLock® Multipoint Option works with Off-the-Shelf Hardware

Whether knob, lever or thumbpress, it works with PanoLock.

GlassCraft provides the PanoLock installed into the door and pre-hung jamb unit. You provide and install your selected Entry Set into the PanoLock. Single door installation includes the PanoLock plus the installed strike plate and reinforcing roller plates. Videos are available online to assist with door entryset installation, should you have questions. Please search PanoLock on YouTube.

Key Features and Benefits

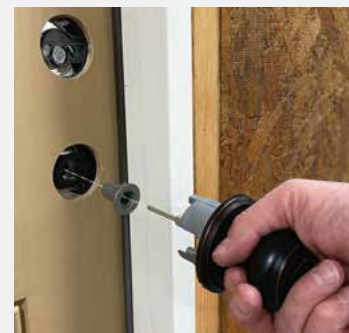

- **Hardware Flexibility:** Whether knob, lever, or thumbpress, PanoLock works with most standard/off-the-shelf handlesets through the use of innovative adaptors, providing flexibility and options previously unavailable. As an added benefit, builders no longer have to specify hardware when purchasing the door, and if changes are needed, hardware can be easily and affordably replaced. Compatible brands include: Buffalo Forge, Schlage, Kwikset, Gatehouse, Baldwin, Brinks and Defiant. No dedicated hardware required.

- **Shop Efficiency:** PanoLock is compatible with standard 5-1/2" center-to-center crossbores and utilizes a 2-3/8" backset, designed to deliver easy, and unrestricted re-handing.

- **Real-World Performance:** PanoLock features tapered upper and lower bolts and adjustable reinforcement plates (located beneath the outer strike plates) with built-in rollers, all of which help deliver forgiving performance and smooth operation, even when conditions aren't perfect. Further, PanoLock's adjustable reinforcing Adjustable Roller Plates also include a space for anchor screws for enhanced security.

- **Affordability:** PanoLock is offered at a more affordable price point vs other multipoint locks – and not just the lock itself. With simpler routing equipment and compatibility with off-the-shelf handlesets, PanoLock's entire cost of ownership is more approachable, "opening the door" for multipoint locks to be specified for a wider range of projects and budgetary needs.

- **Available Finishes:** The faceplate for the mechanism (visible when the door is open) is available in bronze or brushed. The strike plates (there are 3) are available in bronze, nickel, brass, black and stainless steel.

BUFFALO FORGE® CAST BRONZE & BRASS ENTRYSETS

Single or Multipoint Hardware features Cast Bronze or Forged Brass Handleset & Lock Options

Our BUFFALO FORGE brand lock sets are produced by hand-made processes utilizing molten sand-cast bronze or forged brass, and feature solid construction and precision engineered lock mechanisms. These are large lock sets with long escutcheon trim plates and they give a very heavy and strong, secure feel. Excellent design and style, with several models available for different door designs. This hardware has the look and feel of hardware costing three times the price. All use a standard Y1 Keyway. 2 keys provided. 2-3/8" backset.

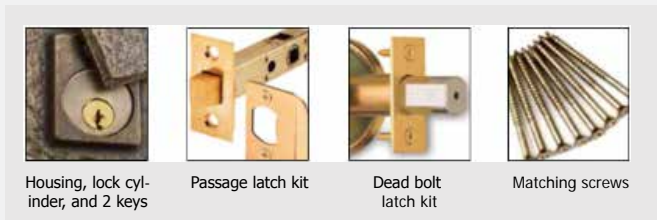

casting the escutcheon plate

All of the lock sets shown on the following two pages are available with standard 2-point models (latch and dead-bolt), or with a multipoint dead bolt. All lock sets are available with matching "dummy" lock sets, which are used for double-door installations. These dummy lock sets do not have any internal mechanism, no key hole, and no thumb latch and are mounted on the "inactive" door, with two-point or multipoint lock sets used on the "active" door. See example photo on page 24 of Dummy Set.

All lock sets shown may be used for right-hand or left-hand door swings and all hardware necessary is included for either installation including 2 lever latches. Installation into the door slab and jamb is included in the price of all of these standard and multipoint lock sets. All Buffalo Forge entrysets will fit all full-sized doors in this catalog.

- Each Buffalo Forge lock set is available in 2 of 4 colors: Dark Bronze or Oil Rubbed Bronze and Satin Nickel or Antique Nickel.
- Included with these Buffalo Forge lock sets are the lock cylinder, dead-bolt, matching screws and face plate(s).

Housing, lock cylinder, and 2 keys

Buffalo Forge - PanoLock Multipoint Option

An excellent option for all Buffalo Forge handleset models on the next 2 pages is our PanoLock+ multipoint lock system.

The multipoint functions exactly the same as any deadbolt, making this very intuitive and easy to operate. Instead of just 1 deadbolt, we offer this option that provides TWO dead bolts, adding a significant amount of security and strength to your entry door. In addition, this creates a tighter weather-seal, and helps to prevent against door warpage.

- 18-1/2" spacing between dead bolts
- Face plate is approx. 24" long x 5/8" wide
- 1-inch dead bolt throw
- Stainless steel construction of mechanism
- Bronze cover plate and strike plates
- PanoLock+ includes 2 lock inserts for Buffalo Forge hardware see image at right

This option will work on any handleset shown on the next two pages. Installation into the door slab and jamb is included in the price.

Door shown at right is a 2 Panel Arch door with Rustic Arch handle and multipoint option.

ROCKWELL® CAST BRASS ENTRYSETS

Single or Multipoint Lock Sets Add Security - Forged Brass Handle Set & Lock Options

These lock sets are produced by the traditional drop-forged process utilizing solid brass, and featuring heavy gauge construction, a precision engineered mechanism, and superior corrosion protection. All use a standard 5 pin SC1 Keyway. Wide bow keys provided. 2-3/8" backset only.

All of the lock sets shown on the next two pages are compatible with the multipoint lock systems shown below. In addition, the **Windsor**, **Savoy**, and **San Jose** are also available as "one-point" traditional lock sets for both 6'8" and 8'0" tall doors. And all lock sets are available as "dummy" lock sets, which are used for double-door installations. These dummy lock sets do not have any internal mechanisms and are mounted on the "inactive" door, with one-point or multipoint lock sets used on the "active" door.

The **Sapphire** multipoint and dummy lock set is also available with a special "PVD" coating on the handle set and stainless steel for the multipoint mechanism for use in coastal installation applications. This is noted as "Coastal" in the item descriptions. This PVD Physical Vapor Deposition coating is harder, more resistant to corrosion and abrasion, and provides a longer-lasting coating when used in coastal areas.

All lock sets shown may be used for right-hand or left-hand door swings and all hardware necessary is included. Installation into the door slab is included in the pricing of all of these one-point and multipoint lock sets.

Rockwell Multipoint Option

Increase security and peace of mind with Rockwell's multipoint lock option with deadlocking tongues built to work with traditional grip hardware. Choose from any of the multipoint handle set trim options shown on the next two pages. This multipoint system is activated with the turning of the dead-bolt lock. All 3 locking points are engaged only when the dead bolt point is locked by turning the thumb latch.

This multipoint lock set includes an anti-saw and kick-proof center dead-bolt for maximum security and a 90-degree consumer friendly locking operation, so you visually know the door is locked when the dead-bolt knob is in the horizontal position. In addition, these multipoint assemblies are produced using heavy-gauge steel with a zinc dichromate finish per ATSM-8633 testing standard. Stainless steel models are available for both 6'8" and 8'0" sizes for coastal installation.

Multipoint lock systems use our standard flush bolts installed on the passive door of a pre-hung double door, which gives the homeowner the option to include dummy handle sets on the passive door with all multipoint lock sets.

Precision-engineered components reduce the need for service calls, providing years of trouble-free service. These multipoint assemblies have been cycle-tested to exceed 300,000 locking cycles. Adjustable strike plates allow for field adjustment during and after installation. The design of these multipoint systems allows for right hand or left hand installation with the same part.

GlassCraft provides installation of the 3-point lock mechanism into the door, and installation charges are included in the cost of these lock sets. Installation involves precision machining of the edge of the door slab, which is performed with CNC machines to ensure precision.

When ordering for double doors, only 1 multipoint lock set is required. You may choose to include a "dummy" handle set on the inactive door for appearance purposes.

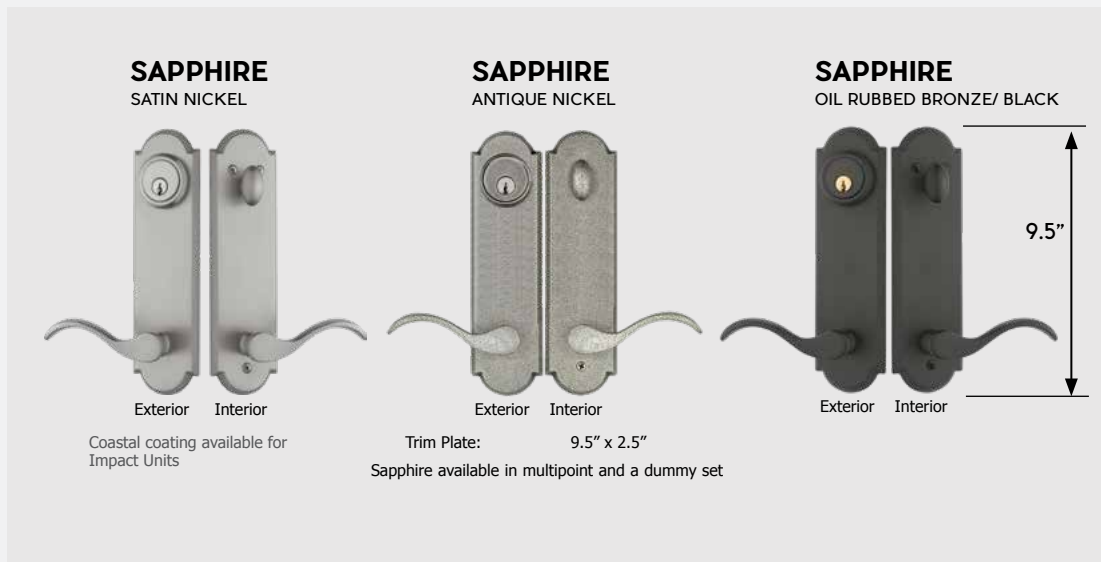

Door shown above is a 2 Panel V-Grooved door with Madrid speakeasy, square clavos and multipoint Windsor lock set.

ROCKWELL® CAST BRASS ENTRYSETS - LEVER LATCH

Rockwell Features & Benefits

- Solid brass, heavy gauge construction with precision-engineered mechanism
- Compatible with multipoint lock system (page 25)
- Available with one-point lock sets for 6'8" and 8'0" doors (for Windsor, Savoy, and San Jose)
- Dummy lock sets available for inactive door in a double door entryway (no internal mechanism)
- Special PVD coating option on multipoint and dummy locksets (for Satin Nickel Sapphire)

SOLID PANEL & SPEAKEASY ENTRY DOORS

FIBERCRAFT® COLLECTION

The FIBERCRAFT® SOLID PANEL & SPEAKEASY DOORS

Premium - Pro - Value Series Solid Panel Doors and Options

The Solid Panel Premium, Pro, and Value Series of solid doors provide an impressive range of options and finishes that fit a wide range of home styles.

Impact Approved Entryways for Security

This Solid Section includes "Impact Approved" door options. Look for the Impact Resistant logo, and refer to page 17 for more information. Please note that all entryways that feature our real exterior wrought iron speakeasy grilles include a special coating on the wrought iron parts. This coating is applied to metal parts to resist rusting and corrosion. While this coating significantly enhances the durability of these decorative wrought iron grilles, we do not warrant the grilles or hardware finish against corrosion.

Mahogany 2 Panel Camber door with V-Grooved option, Impact speakeasy with Clear glass, Square Clavos, and Williamsburg hinge straps.

Factory Finish Options

Choose from 23 color finish options and 3 wood grains in the Estate and Artisan Collections (See pages 8-13 for photos), or from 9 paint color options in the Palette Collection™ (See pages 6-7).

Decorative Iron Straps & Clavos

Use decorative door straps (see page 19) for installation onto the face of a door to give it a rustic, or craftsman, or antique look. Door straps can be mounted on the interior, the exterior, or both sides. Straps may be used with or without the clavos shown on page 19. These door straps and clavos are hand-made and therefore vary slightly.

Door straps and clavos can be added to almost any door in any configuration.

6 Panel with Canterbury straps & square clavos.

V-Grooved Panel Option

GlassCraft's Premium, Pro, and Value Series 2-panel fiberglass doors are available with V-Grooved door panels. This popular detail adds a more rustic appearance to the door. The 2-panel doors may also be ordered without the V-Grooved option.

Peephole Viewer Option

Add a peephole to your solid entry door and get a 180 degree view of your outside perimeter. Available in 2 colors — Satin Nickel and Oil Rubbed Bronze.

SCAN for Pricing & Information about the Peephole Viewer.

Mahogany door panel with V-Groove option.

FIBERCRAFT SOLID & SPEAKEASY DOORS

Speakeasy Option: Fixed or Operable

Most of our solid panel doors shown in this section may be ordered with a "speakeasy" option installed. Two types of speakeasies are available. **First option:** An Operable Speakeasy has rectangular speakeasy door, and is installed in the upper door panel at an approximate height of 5'6". This small door is hinged and latched from the interior side of the door, and may be opened and closed from the interior only. Five glass options are shown below. **Second option:** The Fixed Speakeasy has NO door, and is a window in the door with a clear glass option only. The Fixed speakeasy allows approximately 40% more light than the Operable Speakeasy option as the glass panel is larger.

Both the Operable and Fixed options are available WITH or WITHOUT a decorative grille. The speakeasy grilles are made of real wrought iron and available in four designs, plus one "Impact rated" grille for use in coastal installations. Impact-Rated speakeasy entries must include the Impact Florentine speakeasy grille option.

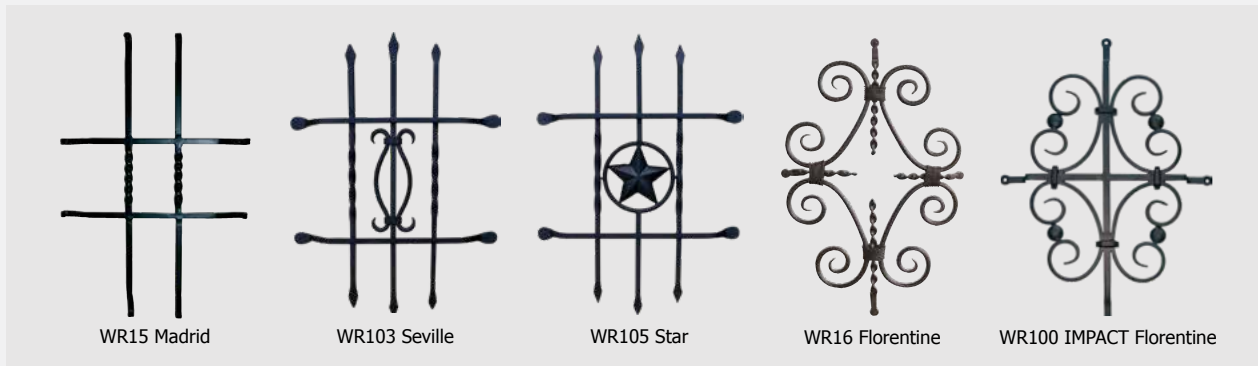

Operable Speakeasy with Seville grille and Water glass texture option

Fixed Speakeasy with no grille and Clear glass

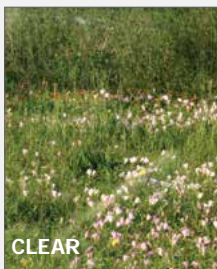

Fixed Speakeasy with Star Grille and Clear glass

Operable Speakeasy Glass Options

Choose from 5 glass texture options to complement your operable speakeasy and door. (Fixed speakeasy option is only available with clear glass). Glass textures shown here are produced using a double insulated tempered glass unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen. The Water and Flemish texture options offer a light obscured view or level of privacy. Rain and Ocean offer the highest level of privacy.

PRIVACY & PATIO ENTRY DOORS

FIBERCRAFT® COLLECTION

THE FIBERCRAFT PRIVACY & PATIO COLLECTION

Clear & Texture Patterned Glass Entry Door Series

GlassCraft's Privacy and Clear Glass Entry & Patio Door Collection features a range of design options that can complement various architectural home styles such as Transitional, Coastal, Cottage, Farmhouse, New American and more.

Many premium options are available, including 7 glass options, 3 wood grains and 4 impact unit configurations. Check this section of the catalog to preview which door styles come with these 4 available Impact rated configurations.

Wood Grain Options

Choose from three wood grain texture options depending upon the door profile; Mahogany, Knotty Alder and Fir.

Two Glass Frames Available — Or Choose Flush Glazed

Doors on page 38 and 39 use either our patented MetroFrame™ fiberglass frame or our patented ClassicFrame™ WPC frame to mount the glass into the door. See page 18 for detailed information, or refer to page 37 for our new flush-glazed Patio Doors.

The 2 double doors at the top of page 38 are available with the ClassicFrame only. The doors on the bottom 2 rows on that page are available with only the MetroFrame™.

All Impact rated doors use our ClassicFrame design regardless of door design.

MetroFrame™

ClassicFrame™

Glass Options

Choose from up to 7 different glass options to complement your FiberCraft Privacy Glass entry or patio door. The glass textures shown here are produced using a tempered double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen. The Water texture option offers a light obscured view or level of privacy. Large Flemish and Reeds glass options offer a moderate level of obscured view. Rain and Cloud offer the highest level of privacy. LowE coated clear glass is available in several doors.

- Arcade White paint finish
- Clear IG glass with Blinds
- Zenia handleset

Enclosed Blinds-Between-Glass

Our enclosed blinds-between-the-glass offer a modern, sleek look to your door with maintenance-free light and privacy control. No dangling cords are needed, adding the benefit of reduced safety risk for children and pets.

The newest blinds controller design offers long-lasting reliability with easy operating effort. One controller operates both the up-down blinds movement and the open-close movement. If the blinds become uneven, then simply move the blinds to the fully up position and they are aligned again.

It can be hard to get a sense of what glass looks like from a photo. Scan here to watch our video for a great view of these blinds.

Full Lite Patio 8-0

2-6 / 2-8 / 3-0 wide Value Series flush glazed, Smooth patio door. Clear LowE IG glass measures 22" x 80" for 2-8 and 3-0 doors, and 20" x 80" for 2-6 doors. 3-0 x 8-0 shown here with:

NARROW PROFILE & LONG PULL ENTRY DOORS

FIBERCRAFT® COLLECTION

The FIBERCRAFT NARROW PROFILE & LONG PULL DOORS

LP Series LONG PULL MODERN Doors

The LP-Series of Long Pull Modern doors are available pre-hung only in a variety of sizes and configurations, including single and double doors. The long door pulls and the deadbolt lock system are optional. These 8 foot tall doors are all Premium Series, and are shown on pages 42 to 45. These pre-hung units use all-composite door frame parts.

For each of these doors, you may choose unfinished, or prefinished in any of 9 paint colors from the Palette Collection™ (see pages 6-7), or from our Estate or Artisan collections for the wood grained doors. Six glass texture options are shown below.

NP Series TDL NARROW PROFILE Doors

The NP-Series of TDL Narrow Profile doors are shown on pages 46 and 47 and are available as door slabs or as pre-hung units in single and double door configurations with all composite components. These doors are True Divided Lite doors which include 4 individual glass panels in each door. They can accept standard hardware including multipoint locks including the Panolock. These doors are flush-glazed (no raised moulding or insert frames) and are “stopped-in” on the interior side of the door with composite glass stop moulding. Three glass options are Clear, Reeds, or Cloud. With smooth fiberglass skin on both sides, these are Premium Series doors that feature a hardwood edge on both edges and a full-width composite top and bottom edge.

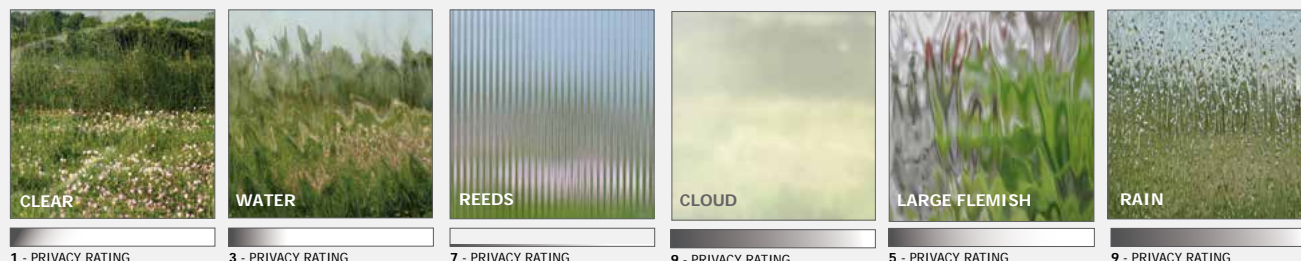

NP Series SDL NARROW PROFILE Doors

The NP-Series of SDL Narrow Profile doors are shown on pages 48 and 49 and are available as door slabs or pre-hung units, in single and double door configurations with all composite components. These doors are simulated divided lite or SDL doors and include one individual glass panel in each door. The muntins or SDL Bars are all fiberglass, and are attached to the surface of the glass panel on both sides of the door. (No shadow bars). These doors can only accept 45mm backset hardware including multipoint locks. They are flush-glazed (no raised moulding or insert frames) and are “stopped-in” on the interior side of the door with glass stop moulding. Two glass options are Clear or Cloud. With smooth fiberglass skin on both sides, these are Premium Series doors featuring a hardwood edge on both edges and full-width composite top and bottom rails.

Glass Texture Options

Choose from these glass texture options to complement your door. These textures are produced using a double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies for each texture. Water glass offers a light obscured view, Reeds glass offers a moderate level of privacy, while Rain and Cloud provide the most privacy. Cloud is an opaque white frosted glass panel. Not all textures are available for every door. Options are indicated for each door on the DoorCrafter tool on our website.

FIBERCRAFT LONG PULL MODERN SERIES Pre-hung Entryways

Fiberglass Long Pull Pre-hung Premium Series Single and Double Doors

The Long Pull Modern Series offers the sleek, contemporary aesthetic of a pivot door with the convenience of standard side hinge construction. These doors, available in 8-foot height and widths of either 36" or 42", are available pre-hung and feature long door pulls of either 48" or 60". They use only a dead bolt or multipoint dead bolt, along with a pair of adjustable roller catches for secure closure. Crafted with composite materials, doors with glass boast either slim aluminum glass frames or flush-glazed glass panels. These Premium Series doors utilize 6.5" wide Timberstrand® door stiles with a solid Rock-Maple wood square edge for added strength and stability.

To configure and price this Long Pull door series, refer to the DoorCrafter tool online.

Modern and Sleek PLUGLESS ALUMINUM FRAMES or FLUSH GLAZED Glass

GlassCraft's aluminum door lite frames combine an aluminum exterior and interior frame with a polymer internal support structure, ensuring a modern aesthetic and optimal energy efficiency through a thermally-broken design. Featuring a "plugless" frame design without visible screws, they sit nearly flush with the door surface and measure 1-1/2" in width. This innovative system enables replacement of damaged or broken door glass, while also offering resistance to moisture, rot, and mildew. Or these doors are available with a "flush glazed" appearance, with the glass panel glazed directly into the door without a door lite frame.

Aluminum Frame

Flush Glazed

Long Pull Options

These Long Pulls are available on any of our Long Pull doors, sold as a matching pair – for the front and back sides of the door.

OFFSET

METRO

MultiPoint & Dead Bolt Options

Long Pull doors typically include a dead bolt only - no handle set. You can supply your own dead bolt lock, or choose from these Rockwell options, which are a Single Point Dead Bolt, or a Multipoint dead Bolt. Notably, the Rockwell Multipoint option is exclusive to these Long Pull Modern doors, providing a multipoint dead bolt lock system.

Rockwell Deadbolt – Nickel

Rockwell Deadbolt – Black

Rockwell Multipoint

Long Pull Modern doors Pre-hung as SINGLE, DOUBLE, or with 1 or 2 SIDELITES

All Long Pull Modern doors are available pre-hung only, with a wide variety of configuration, finish, glass, and design options. The pre-hung door configurations are: Single door, Single Door with 1 Sidelite (either side of door), Single Door with 2 Sidelites, or as a Double Door. The sidelites used for the single or double sidelite configurations use a "direct set", Full Lite Sidelite of Clear safety glass.

For security, all Long Pull Modern entryways are available with the Rockwell Multipoint dead bolt — a dead bolt system with two bolts instead of the usual one. This adds additional security and strength to these 8 foot tall doors.

To configure and price this Long Pull door series, refer to the DoorCraft tool online.

Choose unfinished, or prefinished in any of 9 paint colors from the Palette Collection™ (see pages 6-7). These doors are flush-glazed (no raised moulding or insert frames) and are “stopped-in” on the interior side of the door with wood glass stop moulding. Three glass options of Clear, Reeds or Cloud are shown on page 41. With smooth fiberglass skin on both sides, these are Premium Series doors which feature a hardwood edge on both edges and a full-width composite top and bottom rail. All NP/TDL Series doors have a solid Timberstrand® core — no foam, and can accept standard hardware including multipoint locks.

- 3” wide stiles and top rail – 10-1/2” inch bottom rail
- Four insulated glass panels in each door
- Glass options include Clear, Reeds, or Cloud glass textures
- Door available pre-hung or as a slab
- Use standard lock set hardware including multipoint locks
- Sidelites available
- 6’8” 1 Block -- block is 18-5/8” tall
- 6’8” 2 Block -- block is 35-7/8” tall
- 8’0” 1 Block -- block is 22-5/8” tall
- 8’0” 2 Block -- block is 43-7/8” tall

TDL Narrow Profile Series Matching Sidelites

Direct-set sidelites are available to match all TDL NP Series doors in widths from 14” to 18”. Glass panels are direct-set flush into sidelite. Choose from Clear, Cloud and Reeds IG glass options.

These doors and sidelites are available pre-hung for a door with 1 sidelite, or a door with 2 sidelites configurations.

These sidelites may be used with both door widths, including 36” and 42” wide doors.

The NP-SERIES NARROW PROFILE SDL DOORS

Smooth NP-Series SDL Doors

The NP-SDL (Simulated Divided Light) Series of fiberglass narrow profile doors are available as door only or as pre-hung units.

Doors: All NP-SDL Series doors include smooth skin fiberglass surfaces and flush glazed glass. Doors (and pre-hung units) are available unfinished, or prefinished with our Palette Collection of Sherwin Williams paint colors. The single IG glass panel is flush-glazed (no molding around the glass). Door stiles and rails are all solid Timberstrand® and composite – no foam is used in these doors. **IMPORTANT:** These doors can ONLY USE 45mm (1.75") backset hardware, due to the narrow stiles. You may order your door with our available HOPPE brand 45mm backset hardware OR you may provide your own. (Standard 2-3/8" and 2-3/4" hardware will not work with these narrow stile doors). Refer to DoorCrafter on our website for exact options available.

Door Slab Sizes:	- 29.75" x 79"	- 29.75" x 95"
	- 31.75" x 79"	- 31.75" x 95"
	- 35.75" x 79"	- 35.75" x 95"

Pre-hung Entryways: Pre-hung units have many available options. Refer to our online DOORCRAFTER for all pre-hang options. You may add your choice of hardware, hardware color and Hoppe multipoint hardware and levers (see below).

NP Series Features:

- 3.5" wide stiles and rails
- 8'0" and 6'8" door heights
- 2'6", 2'8", 3'0" door widths
- Clear LowE or Cloud IG glass panels (at right) include shadow bars for authentic look
- 9 Palette Collection™ colors available
- SDL bars-muntins are flush with door face, recessed on the interior
- Doors are solid core (no foam)
- Glass is stopped-in on the interior side with composite glass stops
- Hoppe single point and multi-point hardware is available
- Pre-hung units are Inswing only, Right or Left
- Double doors can include Hoppe shoot bolt gear for inactive door
- All composite jambs on pre-hung units
- SDL muntin bars are fiberglass

Optional 45mm Single and Multipoint Hardware Available

The NP-SDL Series requires the use of 45mm (1-3/4") backset hardware. You may order your door or pre-hung unit without any hardware, or you may select our Hoppe brand single or multipoint 9000-Series 45mm hardware available as an option. The door stiles on these doors are only 3.5" wide and "normal" door hardware with a 2-3/8" backset will not fit onto these NP Series doors. We have selected the HOPPE multipoint hardware system as it features a 45mm (1-3/8") backset, which will fit onto these narrow stiles. Hoppe is a German company and a world leader in door hardware. These are "Euro-Style" lock sets with the key cylinder located below the lever.

The two Hoppe Lever set models offered (Dallas and Verona) are each available in Black or Satin Nickel finish. Please refer to our online DoorCrafter tool to view specific options for these doors.

In addition to the multipoint lockset, double doors may also include a matching Hoppe shoot bolt gear on the inactive door for additional security.

Optional Hoppe Levers:

Dallas handle set with 9.45" x 1.5" backplate in Satin Nickel

Dallas handle set with 9.45" x 1.5" backplate in Matte Black

Verona handle set with 9.45" x 1.5" backplate in Satin Nickel

Verona handle set with 9.45" x 1.5" backplate in Matte Black

Pre-hung Unit Configurations

Unit configurations below are available; single or double in-swing doors, or units with 1 or 2 sidelites.

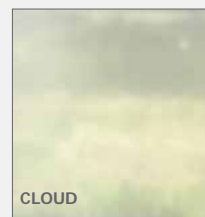

Single door Single Inoperable Fixed Unit Double doors (1 unit with continuous threshold)

CONTEMPORARY ENTRY DOORS

FIBERCRAFT® COLLECTION

The FIBERCRAFT CONTEMPORARY DOORS

PRO Series Doors feature METRO Flat Insert Frames

GlassCraft PRO Series Contemporary doors offer a sleek and modern minimalist design using our patented MetroFrames™. These frames feature clean lines, project out less than 1/4" from the face of each side of the door, and measure 1-3/8" in width. The frame design provides the opportunity for glass replacement, should an individual glass panel be broken. These doors may be ordered individually or assembled in full composite pre-hung jambs.

PRO & PREMIUM Series with URBAN Aluminum Frames

Contemporary door design includes GlassCraft's unique aluminum frames around glass panels and solid door panels. This functional and unique framing is mounted on both sides of the door, with no visible fasteners. These aluminum frames are brushed aluminum for Modern/Contemporary doors. These frames are 1-1/2" in width, with hidden fasteners. Broken glass may be de-glazed for replacement with this aluminum frame system.

Brushed aluminum glass/panel frame

PREMIUM Series Doors feature FLUSH Glazed Glass Panels

GlassCraft's Premium Contemporary Composite Entry Doors series provides a truly modern, clean and minimalist design. A "flush glazed" appearance is achieved by inserting the glass panel directly into the door without a separate door frame. From the exterior side of the door, the look is sleek, without raised molding around the glass panel. From the "interior" side of the door, square glass "stops" hold the glass panel securely in place. This provides the opportunity for glass replacement, should an individual glass panel be broken.

Interior View

These doors may be ordered individually or assembled in full composite pre-hung jambs. The solid Contemporary Series doors feature the BioFoam™ door core, while the doors with glass designs utilize a solid core that allows secure placement of the various glass panel shapes and sizes.

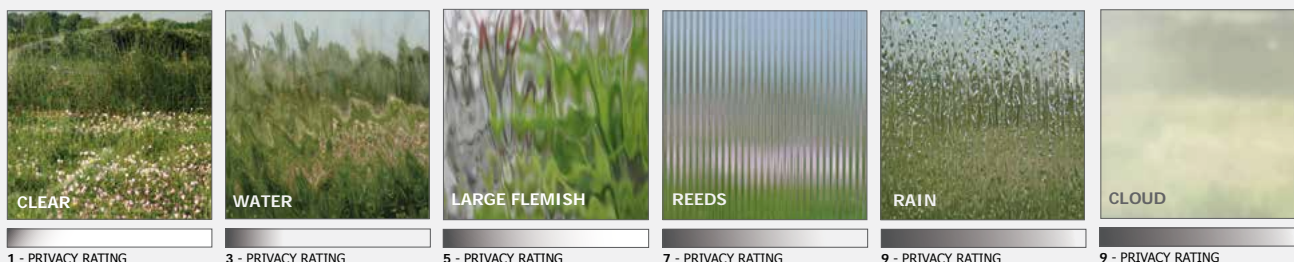

Exterior View

Two Door Textures: Wood Grained Mahogany or Smooth

PRO and Premium Contemporary doors are available in 2 textures. Wood grained Mahogany is available unfinished or prefinished with a choice of Estate (PRO) or Artisan (Premium) finish, or Palette Collection paint. Smooth is available unfinished, or in the Palette colors.

Glass Texture Options

Choose from these glass texture options to complement your door. These textures are produced using a double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies for each texture. Water glass offers a light obscured view, Reeds glass offers a moderate level of privacy, while Rain and Cloud provide the most privacy. Cloud is an opaque white frosted glass panel. Not all textures are available for every door. Options are indicated for each door on following pages.

Contemporary Doors with URBAN Aluminum & Glass · 8'0" Tall

Continental 4 Lite

DECORATIVE GLASS ENTRY DOORS

FIBERCRAFT® COLLECTION

The FIBERCRAFT DECORATIVE GLASS DOORS

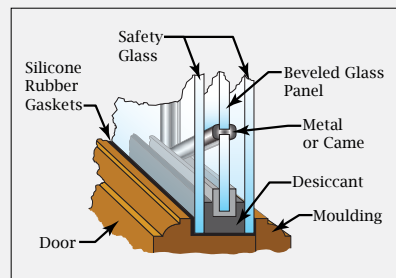

Decorative Glass Door Panels

GlassCraft's Decorative Glass Series features hand cut and beveled glass panels with unique glass clusters and a combination of glass textures that maximize brilliance and sparkle while offering a desired level of privacy.

No one makes better quality decorative glass panels for their doors and windows than GlassCraft. Each decorative glass panel was designed, crafted, assembled, and polished with artistry and performance in mind.

GlassCraft's Decorative Glass Door Panels offer these features:

- Beveled glass designs, each with multiple glass textures (except Sandringham)
- Triple-thick insulated glass panels for improved energy efficiency and security
- Six decorative glass designs to choose from: Brazos, Cantania, Courtlandt, Marsais, Marsala and Sandringham
- Came color for the glass panel design is listed for each door

Triple-thick IG Glass Panels for improved energy efficiency and security.

DIVIDED LITE & CRAFTSMAN ENTRY DOORS

FIBERCRAFT® COLLECTION

The FIBERCRAFT DIVIDED LITE ENTRY DOOR COLLECTION

The SDL Divided Lite Entry Door Series Features Classic Designs

GlassCraft's Divided Lite series provides a selection of classic French and Minimalist Modern doors and timeless Mission and Craftsman style doors. This collection of fiberglass composite doors will complement a wide range of architectural styles. The Divided Lite doors in this catalog feature double insulated glass panels for energy efficiency and security, and simulated divided lite "SDL" construction. The Divided Lite Series provides an impressive range of options and finishes. See pages 6-13 for finish colors and details. These doors may be ordered individually or assembled in full composite pre-hung jambs. Choose from a wide range of design options. Different doors use one of three different glass frame designs detailed on the following pages - Aluminum SDL bars, Fiberglass SDL bars, or Classic Composite SDL bars.

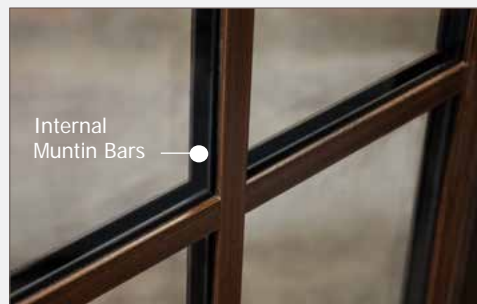

Super Strong SDL Assembly

All Divided Lite doors are constructed with interlocking 1-inch wide SDL bars that lock into place for a stronger, more structurally sound assembly. Using advanced technology, the SDL assembly features precision-cut bars that lock together for improved performance and appearance. SDL Muntin bars are constructed of either aluminum, pultruded fiberglass or wood plastic composite depending on the design series, with no unsightly plugs around the glass panel frame.

Divided Lite Door Construction

Divided Lite muntin bars give the look and feel of historic and traditional divided lite doors, but with improved performance and energy efficiency. SDL divided lite grilles create the illusion of True Divided Lite "TDL" doors by placing composite muntin bars on the interior and exterior of one double insulated glass panel. Muntin bars are permanently fixed to the glass surface with special tape. This allows for superior energy efficiency over TDL doors.

Divided Lite Impact Doors

Impact Divided Lite doors have been tested and approved for use in Windstorm and Impact areas. Please refer to our website for specific Design Pressure ratings for Windstorm/Impact-approved Divided Lite doors. Impact entryways are available with Clear insulated glass only, and do not have internal muntin bars.

Glass Texture Options for Divided Lite Doors

Choose from five different glass texture options to complement your Divided Lite composite entry door. The glass textures shown here are produced using a tempered double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen.

Aluminum SDL Knotty Alder, Mahogany or Smooth Doors

GlassCraft offers three different divided-lite Muntin bars in the SDL Divided Lite Door Series: 1) with high-profile aluminum SDL bars or 2) with low-profile fiberglass SDL bars., or 3) higher-profile composite SDL bars. These doors on these 2 pages include real aluminum glass insert frames and aluminum divided lite "SDL" muntin bars.

These Aluminum SDL glass pane inserts feature Mahogany or Knotty Alder textured fiberglass door skins and are available prefinished or unfinished. Doors are available as slabs or as pre-hung units. Please refer to catalog pages 6-7 for available finish colors. Aluminum Insert Frame and Aluminum SDL bars are always black – regardless of door color.

The unique aluminum insert frames offer a very modern flat and flush appearance. The narrow aluminum SDL muntin bars provide a strong and durable metal SDL bar with only a 1-1/8" width. This modern profile appearance is identical on both the front and back sides of the door. These glass panels are replaceable if ever broken.

The safety tempered glass IG units used in these doors include internal "shadow bars" to provide a true divided lite appearance.

Profiled aluminum muntin bar has only a 1-1/8" width and includes an internal "shadow bar".

Aluminum glass frame provides a flat minimalist appearance on both sides of the door.

Arch Top Double SDL Knotty Alder & Mahogany Door · 8'0" Tall

Glass Frames with Raised Moulding

GlassCraft's Arch Lite and Arch Top double doors shown on these two pages utilize our "ClassicFrame" around the glass panel. This raised-moulding appearance is identical on both the front and back sides of the door. These glass panels are replaceable if ever broken. This style of glazing is different from most other FiberCraft doors which use the MetroFrame™ on both sides of the door.

Photos below show the profiled SDL muntin bar in the top photo and the ClassicFrame in the bottom photo.

FIBERCRAFT SHAKER STYLE CRAFTSMAN MAHOGANY DOORS

The Craftsman Pro Series and Premium Series doors on these 2 pages feature "Shaker-Style" Mahogany wood-grained doors that complement a wide range of decorative elements and architectural styles. These doors utilize GlassCraft's patented MetroFrame™ fiberglass doorlite frames, which are produced using an industry-leading high-compression fiberglass process for superior strength and stability. These frames feature a simple and modern shape that projects only ¼" from the face of the door, and measures 1 3/8" in width. Divided lite muntin bars are flat in shape, and are 1 inch wide (see photo at right). The frames do not use external fasteners that require unsightly frame plugs to hide the assembly screws, but rather incorporate a patented clip system, allowing replacement of the glass in the event of breakage.

All Premium series Craftsman doors are available with an optional "Dentil Shelf".

Unique Mortise and Tenon Feature for Artisan Distressed Finish Option

GlassCraft's Premium Series Craftsman style doors are available finished with **Estate Collection** or **Artisan Collection** stain finish options and with **Palette Collection** paint finish options. The Pro and Value Series Craftsman doors are available with **Palette** or **Estate** options. Doors finished with the Artisan Collection Distressed colors include unique "mortise and tenon" faux door peg markings (see photo at right). This unique finish appearance provides a combination of special antique patina, natural bur marks, rustic characteristics, indentations, pits, scores, and worm holes. (No door peg or distress marks on Artisan Antique finished doors). These Artisan finishes, wood grains and textures create a unique, authentic Craftsman Mahogany appearance.

Please note: The photos in this catalog offer an indication of the final appearance, but due to variations in texture, grain, and color, the actual appearance will vary.

Full Lite SDL Mahogany or Smooth Door · 8'0" Tall

MetroFrame™ Featured on these Divided Lite doors

The GlassCraft patented MetroFrame™ fiberglass door lite frames are produced using an industry-leading, high-compression fiberglass reinforced frame for superior strength and stability. These frames feature a modern shape that projects out less than 1/4" from the surface of the door, and measures 1-3/8" in width. The frames do not use external fasteners that require frame plugs to hide the screws, but rather incorporate a multi-patented clip system that does not require external screws or plugs. This unique frame system allows for the replacement of your door glass should it be damaged or broken. No need to replace the entire door as with other "plugless" frame systems. Plus they are impervious to moisture, and resist damage due to rot and mildew. Strong and secure!

The elegantly thin divided-lite muntin bars are produced using the "pultruded fiberglass" process to create a super-strong product that won't warp or twist in high-heat installations.

GBG (Grille-Between-Glass) DOORS

FIBERCRAFT® COLLECTION

The FIBERCRAFT GBG (Grille-Between-Glass) COLLECTION

Two types of GBG Glass Panels: Aluminum Grids

Two types of Grille-Between-the-Glass panels are available, and both types offer a grid which is permanently sealed between 2 panes of safety glass. This allows for a pane of glass on both sides of the grid, which enables easy cleaning. These 2 types are: 1) Aluminum grid style and 2) Polymer decorative design style grid. The Aluminum grid style options are shown on the opposite page. These designs are linear, and offer a sleek and minimalist appearance. Grids are black color aluminum and are 7/8" wide. Decorative design style grid is shown on the following pages.

Detail photo of GBG Aluminum grid.

The FIBERCRAFT GBG (Grille-Between-Glass) COLLECTION

Patented GBG Decorative Panels

The wrought-iron inspired GBG, or “grille-between-the-glass” Collection of decorative doors are unique in their appearance, and feature simulated hand-tooling marks and unique designs. GlassCraft has multiple US Patents approved for this product. Available in most door sizes, there are four GBG grille designs to choose from: Austin, Cantania, Palermo, Salento. Each decorative grille is finished in Antique Black, and mounted between two pieces of tempered safety glass. There are five glass texture options available with varying obscurity levels – all of which allow daylight to enter. These unique designs are copyright and owned by GlassCraft.

GBG Design Options

AUSTIN with clear glass option

CANTANIA with rain glass option

PALERMO with rain glass option

SALENTO with reeds glass option

WROUGHT IRON & STEEL GRILLE ENTRY DOORS

FIBERCRAFT® COLLECTION

The FIBERCRAFT IRON & STEEL GRILLE DOOR COLLECTION

Patented FerraLites® Wrought Iron or Steel Grilles

GlassCraft's FerraLites® External Wrought Iron or Steel Grille Series features real handmade wrought iron grilles or CNC cut modern steel grilles, and textured insulated glass panels. This patented design features a decorative metal grille that is "hinged" to allow the grille to be opened for ease of cleaning. The iron grilles are powder-coated in an antique black color. Thirteen metal grille design styles are available, and each grille is available in up to 6 glass texture options with varying obscurity levels. The degree of "obscurity" is noted for each glass texture option (next page). The glass panels use tempered safety glass to make a two-layer-thick safety glass panel. GlassCraft has multiple patents on this unique product.

*Real wrought iron,
hand forged by
real artisans.*

A Operable wrought iron or steel grilles for easy cleaning and lockable with a screw for security.

B Multiple glass options: Clear, Water, Reeds, Cloud, Rain and Large Flemish

C Award-winning Estate & Artisan prefinish options for the most authentic wood grains

D Panel with smooth or V-grooved options (V-groove N/A on 2/3 Lite doors)

Decorative Grilles Open for Cleaning

GlassCraft's external wrought iron grilles include a patented operating grille hinge mounting system that makes cleaning the glass easy. Grilles may be locked into place with a locking screw.

Operable wrought iron grilles

The FIBERCRAFT IRON & STEEL GRILLE DOOR COLLECTION

Traditional Wrought Iron Grilles or CNC Cut Steel Modern Grilles

The decorative grilles shown in this section are either real hand-made wrought iron grilles (photo at far right), or are laser or plasma cut steel grilles (photo at near right), cut on CNC machines. These iron or steel grilles are noted throughout this section. Either way, they mount and function on the door the same way, and all are powder-coated for durability. Several of the doors with wrought iron grilles also have matching sidelites available. Please refer to the DoorCrafter online for exact options available for each door.

Steel Grille

Wrought Iron Grille

IMPACT Pre-hung Units with Exterior Wrought Iron Grilles

All doors and entryway units in this catalog section are available as Impact-Tested units for coastal area installation. These doors with our exterior wrought iron or steel grilles feature a special powder-coated finish layer on the decorative grille. This coating is commonly used on offshore oil-rigs, applied to metal parts to resist rusting and corrosion. While this coating significantly enhances the durability of these decorative wrought iron grilles, we do not warrant the grilles or hardware finish against corrosion.

Textured Glass Options for Wrought Iron / Steel Grille Doors

Choose from 6 different glass texture options to complement your Wrought Iron or Steel Grille composite entry door. The glass textures shown here are produced using a tempered double IG (insulated glass) unit to provide safety, security, and energy efficiency. The capacity to see through the glass panel varies depending upon the glass texture chosen.

Impact rated doors are available with all glass textures except Cloud.
