Fiberglass Composite Doors for Coastal Installations

Impact Rated Composite Entry Doors

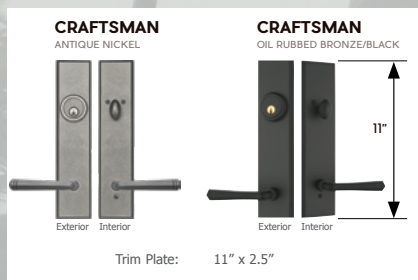

Protect your family and your home from break-ins and weather related impacts with GlassCraft's Impact Rated fiberglass doors. Order your impact door units as an assembled Impact-Approved entryway and provide a high level of safety and security for your home. Available at an additional cost and in varying configurations, these impact door units must be ordered from GlassCraft as an assembled Wind-storm-Impact Approved entryway.

GlassCraft's Impact rated fiberglass entryways have been evaluated for compliance, and are approved for installation in designated catastrophe areas along the Florida and Texas coasts when installed as required and specified in the International Residential Code (IRC) and the International Building Code (IBC).

- All impact rated doors w/ 3-point locks:
DP Rating: +50.14 / -50.14
- All impact doors without 3-point locks
(and with Schlage or Kwikset locks):
DP Rating: +45.0 / -50.0

Available Impact Handle Sets

Composite Frames and Components

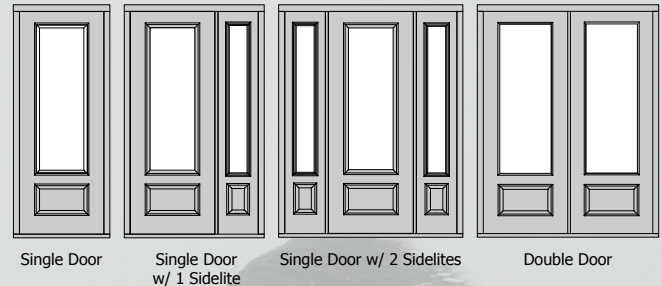

Door frames, jamb legs, brick mold, mull posts, outside mullion, quarter-round and t-astragals in composite material are available. These composite components offer resistance to rotting and warping and may be prefinished to match the door. GlassCraft's composite components are made of recycled materials and offer these advantages: non splintering, excellent screw and nail retention, low linear expansion, routes beautifully without chipping or ragged edges, and accepts paint and stain like real wood without the need for priming.

Impact Pre-hung Inswing and Outswing Units

We can pre-hang the four entryway configurations shown below using our 3'0" or 2'8" wide and 6'8" or 8'0" tall fiberglass doors and sidelites. These four units are available as both "inswing" and "outswing" units. Pre-hung units include brick mold, door sweep, weatherstripping, and adjustable threshold, plus 4 hinges on both 6'8" and 8'0" doors, and astragals where applicable. IMPACT pre-hung units also include all door lock set and handle set hardware and a multi-point lock system. Please note that the multi-point handleset must include a lever-action model, not a thumb latch.

Please note that for Impact entryways, we use double jamb legs (no mull posts) between sidelites and the door, and a continuous sill.

Available Impact Configurations

Pre-finished Composite Pre-hung Entryways: The four entry configurations shown are available professionally pre-finished to match our fiberglass doors. Refer to the FiberCraft Catalog to view all finish options, including the Estate and Artisan finish collections, and the Palette Collection of 9 paint colors.

GlassCraft's online DoorCrafter tool: Easily access information and pricing for Pre-hung, Multi-point Impact rated units by scanning the QR code found under each door in this catalog.

The Wrought Iron & Steel Grille, SDL, and Clear & Privacy Glass doors are also available as Impact rated for the door slab only, and/or with Standard lock-sets. Scan this QR for the info and pricing on those doors:

(Standard Door slab only)
